This Informed Consent for Teletherapy contains important information concerning engaging in electronic psychotherapy or teletherapy. Please read this carefully and let me know if you have any questions. This consent shall only apply to clients physically within the State of Colorado seeking therapeutic treatment within the State of Colorado.

## Benefits and Risks of Teletherapy

Teletherapy refers to the remote provision of psychotherapy services using telecommunications technologies such as video conferencing or telephone. One of the benefits of teletherapy is that the client and therapist can engage in services without being in the same physical location. This can be helpful in ensuring continuity of care if the client or therapist moves to a different location, takes an extended vacation, or is otherwise unable to continue to meet in person. It can also increase the convenience and time efficiency of both parties.

Although there are benefits of teletherapy, there are some fundamental differences between in-person psychotherapy and teletherapy, as well as some inherent risks. For example:

- Risks to confidentiality. Because teletherapy sessions take place outside of the typical office setting, there is potential for third parties to overhear sessions if they are not conducted in a secure environment. I will take reasonable steps to ensure the privacy and security of your information, and it is important for you to review your own security measures and ensure that they are adequate to protect information on your end. You should participate in therapy only while in a room or area where other people are not present and cannot overhear the conversation.
- Issues related to technology. There are risks inherent in the use of technology for therapy that are important to understand, such as: potential for technology to fail during a session, potential that transmission of confidential information could be interrupted by unauthorized parties, or potential for electronically stored information to be accessed by unauthorized parties.
- Crisis management and intervention. As a general rule I will not engage in teletherapy with patients who are in a crisis situation. Before engaging in teletherapy, we will develop an emergency response plan to address potential crisis situations that may arise during the course of our teletherapy work.
- Efficacy. While most research has failed to demonstrate that teletherapy is less effective than in person psychotherapy, some experienced mental health professionals believe that something is lost by not being in the same room. For example, there is debate about one's ability when doing remote work to fully process non-verbal information. If you ever have concerns about misunderstandings between us related to our use of technology, please bring up such concerns immediately and we will address the potential misunderstanding together.

## Electronic Communications

We will discuss which is the most appropriate platform to use for teletherapy services. You may be required to have certain system requirements to access electronic psychotherapy via the method we choose. You are solely responsible for any cost to you to obtain any additional/necessary system requirements, accessories, or software to use electronic psychotherapy.

## Appropriateness of Teletherapy

If at any time while we are engaging in teletherapy, I determine, in my sole discretion, that teletherapy is no longer the most appropriate form of treatment for you, we will discuss options of engaging in face-to-face in-person counseling or referrals to another professional in your location who can provide appropriate services.

## Confidentiality

I have a legal and ethical responsibility to make my best efforts to protect all communications, electric and otherwise, that are a part of our teletherapy. However, the nature of electronic communications technologies is such that I cannot guarantee that our communications will be kept confidential and/or that a third party may not gain access to our communications. Even though I may utilize state of the art encryption methods, firewalls, and back-up systems to help secure our communication, there is a risk that our electronic communications may be compromised, unsecured, and/or accessed by a third party.

The extent of confidentiality and the exceptions to confidentiality that I outlined in my Disclosure Statement/Informed Consent still apply in teletherapy. Please let me know if you have any questions about exceptions to confidentiality.

## Emergencies and Technology

Assessing and evaluating threats and other emergencies can be more difficult when conducting teletherapy than in traditional in-person therapy. In order to address some of these difficulties, I will ask you where you are located at the beginning of each session. It is important for you to identify emergency resources that are near your location that I may contact in the event of a crisis or emergency to assist in addressing the situation.

NOTE: By providing information here for my Emergency Contact, I give permission for the named individual(s) to be contacted in the case of such an emergency.

### \* Emergency Contact's Information:

Name(s)

Relation to Me

Phone Number

Address

If the session cuts out, meaning the technological connection fails, and you are having an emergency do not call me back, but call 911, the Colorado Crisis Hotline at 844-493-TALK (8255), or go to your nearest emergency room. Call me after you have called or obtained emergency services.

If the session cuts out and you are not having an emergency, disconnect from the session and I will wait two (2) minutes and then re-contact you via the teletherapy platform on which we agreed to conduct therapy. If you do not receive a call back within two (2) minutes, then call me on the phone number I provided you (720-438-8188). If there is a technological failure and we are unable to resume the connection, you will only be charged the prorated amount of actual session time.

## Fees

The same fee rates shall apply for teletherapy as apply for in-person psychotherapy. However, insurance or other managed care providers may not cover sessions that are conducted using electronic psychotherapy. If your insurance, HMO, third-party payer, or other managed care provider does not cover electronic psychotherapy sessions, you will be solely responsible for the entire fee of the session. Please contact your insurance company prior to our engaging in teletherapy sessions in order to determine whether these sessions will be covered.

## Informed Consent

This agreement is intended as a supplement to the general informed consent that we agreed to at the outset of our clinical work together. Your signature below indicates agreement with its terms and conditions. This agreement is supplemental to my general informed consent and does not amend any of the terms of that agreement.

I, the client, having been fully informed of the risks and benefits of teletherapy; the security measures in place, which include procedures for emergency situations; the fees associated with teletherapy; the technological requirements needed to engage in teletherapy; and all other information provided in this informed consent, agree to and understand the procedures and policies set forth in this consent.
